DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 10-24 and 32-35, drawn to positive active material compositions, classified in class 429, subclass 231.95, 223, 224 or 231.1.
 - II. Claims 7-9 and 25-31, drawn to a method of preparing the positive active material composition, classified in class 423, subclass 306, 463, 464, 465, 594.4, 594.6 or 599.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product, (*as admitted by the applicants*) the process can be used to make any of the materially different lithiated compounds as recited in claim 2 and/or used to make any of the positive active material composition adding any of the specific additive compounds as recited in claim 1 per se. Additionally, the product as claimed can be made by another and materially different process, (*as admitted by the applicants*) by a method including the operation of mixing a coating composition with a lithiated intercalation compound particulate and fusing the coating compound to coat the particulate.

Art Unit: 1745

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

In addition, further restriction is required. Thus, applicant must elect one (1) of the above groups and one (1) of the species below as applicable.

5. This application contains claims directed to the following patentably distinct species of the claimed invention, the following species have been identified:

Species 1: the thermal absorbent element being A1 or B per se;

Species 2: the additive compound comprising an A1-included hydroxide by itself;

Species 3: the additive compound comprising a B-included hydroxide as such;

Species 4: further comprising another additive compound

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Michael D. Stein on 10/30/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
